- Test websites across browsers, operating systems and devices.
- Maintain, configure and troubleshoot servers.
- Ensure the site security by setting up firewalls and login pages.
- You optimize loading speeds and capacity.
- Troubleshoot in case of problems.
- Responsible for Marketing and Search Engine Optimization (SEO and SEM).
- Make graphic designs for department.
- Assist by events.

#### requirements

To fulfill this job you have a higher level education and a minimum of 2 years' experience in a website management role. Furthermore you have:

- Hands-on experience with CMS frameworks (WordPress is a plus).
- Knowledge on both the technical and content side of SEO and experience with tools such as Google Search Console, Analytics, Datastudio etc. (Google Tag Manager is a plus).
- Experience with web development and web design.
- Knowledge of programming languages and operating systems, online marketing, and IT security.

#### furthermore

- Your communication skills (in English) are excellent.
- You have a working experience in running website sprints internally or together with an external agency.
- You have the ability to manage multiple stakeholders effectively to organize and prioritize projects based on business need.
- You are proficient in number crunching in Excel.
- You think "customer first" with a strong understanding of customer points and buyer journeys, websites UX, Conversion Rate Optimization and web accessibility best practices.
- You are excited about problem solving and you have an analytical mindset.
- Knowledge of Life Sciences is a plus.

#### We offer

- A dynamic work environment with enthusiastic colleagues.
- Working at the forefront of science.
- Room for initiative and responsibility
- Family atmosphere.
- Incentives such as bonus and commission.

**Who are we?**

CleanNA is a Dutch manufacturer of laboratory reagents for the isolation of DNA and RNA from biological materials. Through our technology we focus on laboratories in need of process automation. We work together with our customers to transform their specific needs into customized solutions using our experience and scientific knowledge of magnetic beads. We carry out our activities from Waddinxveen or Cambridge (UK).
